

Overview

Once you have set up the iPad with the grading app as described in the **'Setting up and accessing assignments'** guide you can add grades and feedback.

Adding feedback

The process of adding feedback via an iPad is much the same as it is on a desktop PC although consistent with the standard iPad touch screen interface.

The iPad grading app supports the following GradeMark features:

- Annotated comments (bubble and text)
- QuickMark
- General comments
- Audio comments
- Rubrics and Grading Forms

Note: Rubrics and Grading Forms need to be attached to an assignment via a desktop computer before they can be used from the iPad.

The following two videos provide an overview for adding annotation and overall comments:

- **Adding annotated comments** - https://youtu.be/AZwPrtdM_Hg
- **Adding overall comments** - <https://youtu.be/bNKMaIPR-AE>

Further support

- Further resources and support are available in the TEL Toolkit: www.bournemouth.ac.uk/tel-toolkit
- Any technical issues should be reported to the IT Service Desk. (01202 9) 65515.
