

Overview

uGrade is a Peer Assessment tool and is Bournemouth University's iteration of the open source WebPA software.

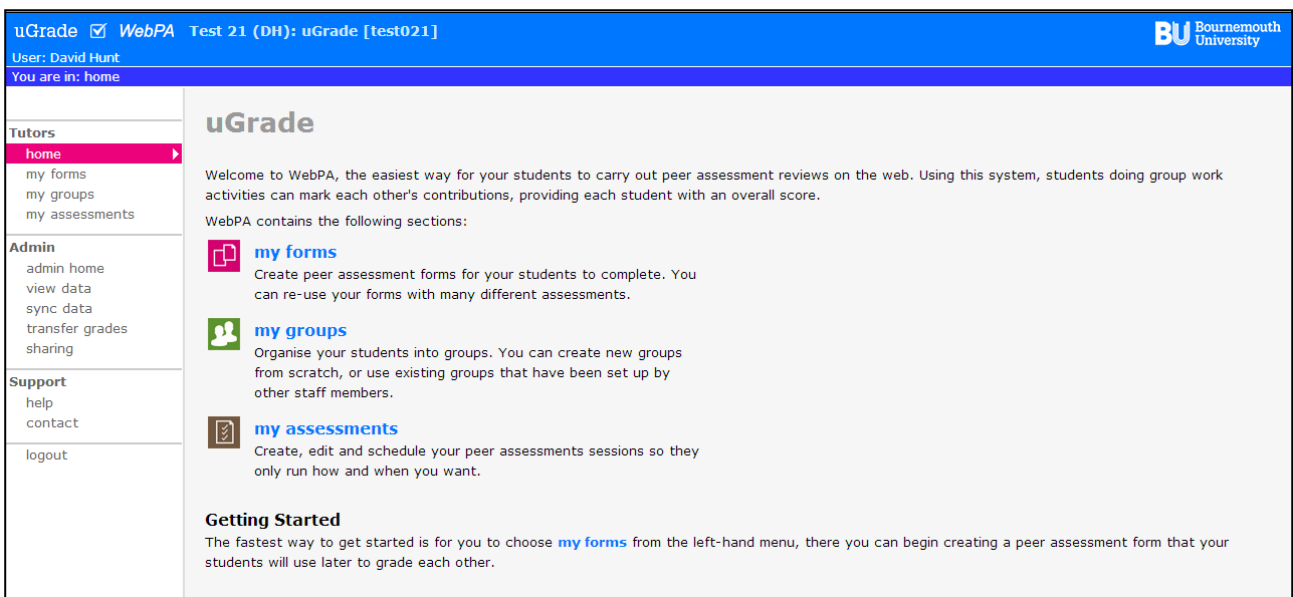

Once set up, students can peer assess their group, including self-assessment if appropriate, using either a Likert scale or split 100, there is also the option for an overall comment and marking grades can be pushed through to the myBU Grade Centre as required.

Although not available by default, uGrade is integrated into myBU and can be activated on request.

Getting Started

Once activated, the uGrade tool can be added as a tool link in the left side menu and when clicked will open in a new window or tab depending on the browser in use.

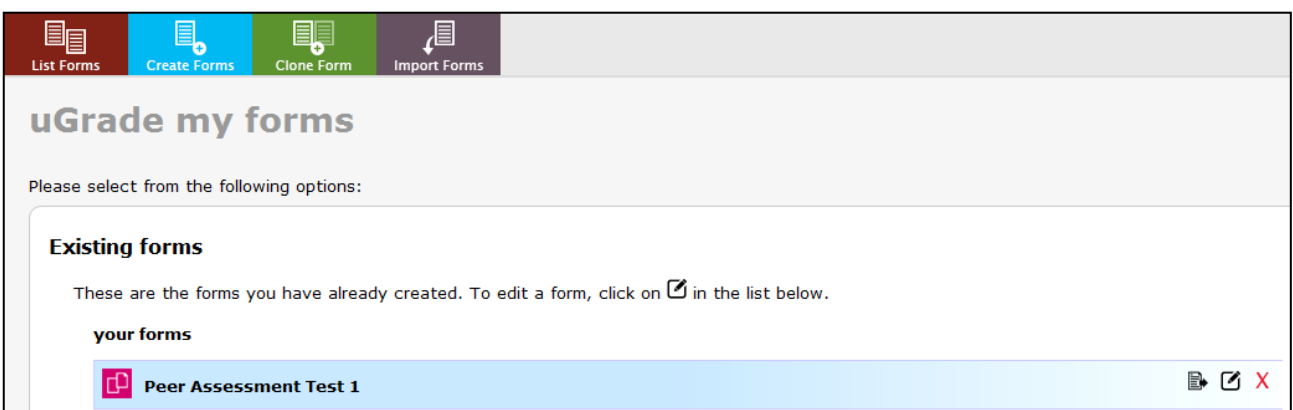

Note: depending on the browser used, pop-up blockers may need to be deactivated.

The screenshot shows the uGrade home page. At the top, there is a blue header with the text "uGrade WebPA Test 21 (DH): uGrade [test021]" and the Bournemouth University logo. Below the header, it says "User: David Hunt" and "You are in: home". On the left side, there is a navigation menu with sections: "Tutors" (home, my forms, my groups, my assessments), "Admin" (admin home, view data, sync data, transfer grades, sharing), "Support" (help, contact), and "logout". The main content area is titled "uGrade" and contains a welcome message: "Welcome to WebPA, the easiest way for your students to carry out peer assessment reviews on the web. Using this system, students doing group work activities can mark each other's contributions, providing each student with an overall score. WebPA contains the following sections: my forms, my groups, my assessments." Each section has a brief description and a small icon. At the bottom, there is a "Getting Started" section with a tip: "The fastest way to get started is for you to choose my forms from the left-hand menu, there you can begin creating a peer assessment form that your students will use later to grade each other."

My Forms

To create or manage forms, click 'my forms' either on the home page or in the left side menu.

The screenshot shows the "uGrade my forms" page. At the top, there is a navigation bar with four buttons: "List Forms", "Create Forms", "Clone Form", and "Import Forms". The main content area is titled "uGrade my forms" and contains the text "Please select from the following options:". Below this, there is a section titled "Existing forms" with the text "These are the forms you have already created. To edit a form, click on [edit icon] in the list below." Underneath, there is a section titled "your forms" which contains a single form entry: "Peer Assessment Test 1". To the right of this entry are three icons: a document icon, an edit icon, and a delete icon.

The default view is 'List forms', any existing forms can be Exported, Edited or Deleted as required.

To create a new form, click the 'Create Form' tab at the top of the page to launch the form wizard.

Enter a Form Name, select the required scoring type and click 'Finish'.

uGrade Create a new form

This wizard takes you through the process of creating a new assessment form. When it is complete, you will be able to edit the form to add assessment criteria.

You are on **step 1 of 1** in the create a new form wizard.

To create a new form you just need to give it a name. To avoid confusion, the name should be unique, but you can create forms using the same name if you wish.

Your form will be reusable with any number of assessments, so if you intend to use it again you should give the form a more generic name and not name it after a module in a particular academic year.

For example, *"Teamwork Assessment"* or *"ABC123 Group Coursework"*.

Name for this new form

What type scoring will your criteria use?

WebPA offers two different ways that your students can score each other.

- Likert Scale** (default)
The standard WebPA scoring. Students rate each other against a small likert scale, typically 1-5 or 1-10, by simply clicking the appropriate radio button.
- Split 100**
Students must split 100 marks between their teammates for each criterion, with each score being entered manually into the appropriate box. The score for each criterion must total 100, so students using this method will be made more aware of the effects of their peer assessment scores, as giving more marks to one team mate means another must get less.

Click on 'Add a new criterion'.

Note: the Form Name and Scoring Type can be changed as required, remember to click 'Save Changes'.

Assessment Criteria

You have not added any assessment criteria to this form yet. You need to before the form can be used.

Enter a Criterion subject title and description or guidelines.

Adjust the scoring range as required and click 'Next'.

To create a new marking question, you firstly need to enter the text of the question.

You can phrase the assessment criteria however you like, either as statements or questions. The important thing is that it's clear what criteria the student is assessing.

Use the description box to further clarify what you want the student's to assess when scoring this criterion.

(optional)

Now select the range of scores you will allow for this question.

Scores can range from to

Please Note - allowing 0 scores means students can receive no marks if they failed to contribute at all.

Enter the required scoring descriptions and click 'Finish'.

Your new assessment criterion allows scores from 1 to 5. You can use the boxes below to provide a description what those scores should mean. It's good practice to describe the meaning of at least the top and bottom scores, but you are free to provide as many, or as few, descriptions as you like. Leave a description blank and it will not be displayed on the form.

uGrade Create new groups

This wizard takes you through the process of creating a new collection of associated groups. When it is complete, you will be able to edit the groups and assign students to them.

You are on **step 1** of **4** in the create new groups wizard.

Firstly, we need to give this new collection of groups a name. To avoid confusion, the name should be unique, but you can create collections using the same name if you wish.

The name should describe what the groups are for. For example, if the students are doing coursework for module 05ABC123, then name the collection, *05ABC123 - Coursework Groups*.

Name for this new collection

Select the number of groups required, enter a group prefix identifier and the required numbering style then click 'Next'.

The module contains **6 students** in total.

Now you can set how the new groups will be created. To save time, the system can automatically create sequentially named groups for you. If you do not want to use sequential names, or if you just want to create all your groups yourself, select *0* in the *Number of groups to create* box below.
