“ Cloud based services are brilliant. They’re flexible, great for disaster recovery and let you work from anywhere. ”

“ However, they are also at risk of data breaches and where your data will be processed & hosted. ”

Check your provider

Does your provider protects your sensitive information when it’s stored in their premises and while processing it?

Review your contract

Read the terms and conditions of used, as well as if the service provider has the accountability to protect your data.

Read the legal stuff

- Data Protection Act
- EU Data Protection Regulations
- Payment Card Industry Data Security Standards
