Programme Specification - Section 2

AIMS OF THE DOCUMENT

The aim of this document is to definitively identify the programme and level learning outcomes for the proposed BA (Honours) Criminology. This document will also clarify the course structure and relevant BU Regulations that will apply, particularly in relation to admission, assessment, progression and award if approved.

Academic and Professional Contexts

Criminology is viewed as a popular discipline for undergraduates, holding strong social relevance to contemporary society, in terms of changing demographics, societal challenges and issues relating to globalisation and migration. Criminology concerns the systematic study of crime, as well as the criminal justice system. Scholarly attention to issues of crime and criminal justice allows for an extensive range of approaches and questions to be addressed, enabling a more complete understanding of the field of study. Students on the BA (Honours) Criminology programme will acquire in-depth knowledge of the key theories, themes and concepts, approaches and histories of the disciplines of criminology. They will be enabled to examine their continuing relevance to understanding the constitution of society in late modernity, and the possible constructions, causes, impacts, and costs of crime as particularly significant social phenomena. In addition, students will be versed in the prevention of crime and engaged in both quantitative and qualitative research methodologies. Also, a significant historical and cross-cultural analysis of the phenomena of crime and criminal justice will be offered.

QAA subject benchmarks for honours degrees in the academic discipline of criminology have informed the design of this programme. Students undertaking the BU programme benefit from an opportunity to develop specialist knowledge of diversity, social processes and social change, crime, criminal justice and criminological theories from a criminological perspective. Graduates are equipped with communication skills, along with analytical and research skills that are increasingly necessary for professional work. Studying this degree gives students a chance to seek employment in local and national government departments, education, the corporate sector together with higher study and professional study, alongside providing 'graduateness' in a key area for the contemporary world and for the global citizen required within it.

Programme Aims

Drawing on QAA Code for HE and Subject Benchmarks, the programme aims to develop challenging, questioning and adaptable graduates, who:

- Demonstrate critical knowledge and a systematic understanding of key context, concepts and theoretical approaches in criminology and criminal justice issues.
- Demonstrate sophisticated conceptual understanding of the way in which crime has been historically, culturally and social constructed.
- Articulate and justify a range of social and policy approaches that have, and can be used to prevent, address or reduce crime and its adverse impacts on individuals and society at large.
- Critically describe the processes of globalisation and demographic change and their impact on the operation of social processes and exchange, such as in human trafficking and in organised criminality.
- Develop a critical understanding of comparative social and criminological analysis using appropriate social research methodologies.
- Evaluate the relationship between criminological argument, theory and evidence.

Programme Specification - Section 2

The programme also aims to provide graduates with the following skills:

- The ability to formulate, investigate, discuss and evaluate criminal justice and criminological informed questions through a primary research-based dissertation.
- The ability to plan, undertake and present scholarly work that demonstrates an in- depth understanding of criminological aims, methods and theoretical considerations.
- Independence of thought, as well as the critical, analytical and synoptic skills sufficient to pursue further postgraduate study in criminology and cognate disciplines, or high level careers in a range of areas.
- Strong oral presentation and communication skills necessary for further postgraduate study or advancement in careers in a range of related areas.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The BA (Hons) Criminology programme aligns with BU 2025's distinctive approach to fusion, inspiring learning, advancing knowledge and enriching society. The programme is designed to improve and enhance departmental education and research excellence, providing the students with an outstanding education and research experience, and preparing them for work in a range of professions, through the academic and applied study of criminology. The focus on active research engagement underpinning the educational philosophy of our programmes is designed to attract high quality learners. The fusion approach will foster relationships with social oriented and criminal justice agencies in the region and abroad.

In order to achieve BU 2025's strategic plan to ensure academic sustainability and consistent high quality, the Department of Social Sciences and Social Work delivers all its social science programmes as part of an integrated suite which ensures that in addition to providing students with a sound basis in their disciplines of choice, also introduces them to a broad social scientific perspective. Students are able to choose optional units in their own discipline or those of other disciplines within the integrated suite.

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for each unit considers the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations at Level 6 are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound. The word count for the Dissertation unit is 10,000 words, equivalent to 40 credits,

Students who choose to undertake the sandwich placement will engage in a minimum of 30 weeks of full-time work-based learning between Levels 5 and 6. Sandwich students must pass the non-credit bearing placement portfolio assessment between Level 5 and Level 6 in order to graduate.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – including where appropriate according to the content of the unit - academic staff, qualified professional practitioners, demonstrators/technicians and research students.

INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES STUDENTS TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

ADMISSION REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Admissions regulations. These are available at:

<https://intranet.bournemouth.ac.uk/pandptest/3a-undergraduate-admissions-regulations.pdf>

PROGRESSION ROUTES

Recognition arrangements provide formally approved entry or progression routes through which students are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply. Please see the Recognition Register for a full list of approved Recognition arrangements and agreed entry criteria.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Assessment Regulations. These can be found at:

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

Every student will be given the opportunity to undertake a placement. The programme offers two placement units:

- *Placement Learning unit* - An optional Placement Unit (20 days or 150 hours) will be available at Level 5.
- *Practice Placement (Sandwich option)* - A 30-week placement taken over the course of a full academic year at Level P.
- Further details are available in the unit specifications and placement handbooks.

Students wishing to undertake placements through either route will be expected to actively seek out opportunities for placement and make arrangements to undertake them in a way which meets all appropriate guidelines.
