AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

Academic and Professional Contexts

Sociology and Criminology are viewed as popular disciplines for undergraduates, holding strong social relevance to contemporary society, in terms of changing demographics, societal challenges and issues relating to globalisation and migration. Sociology seeks to address the need for a clear understanding of society and social processes to address the problems of late modernity. Criminology concerns the systematic study of crime, criminal behaviour and its causes and prevention.

QAA subject benchmarks for honours degrees in the academic disciplines of sociology and criminology have informed the design of this programme. Students undertaking the BU programme benefit from an opportunity to develop specialist knowledge of diversity, social processes and social change, crime, criminal justice and criminological theories from a sociological perspective. Graduates are equipped with communication skills, along with analytical and research skills that are increasingly necessary for professional work. Studying this degree gives students a chance to seek employment in local and national government departments, education, the corporate sector together with higher study and professional study for social work, alongside providing 'graduateness' in a key area for the contemporary world and for the global citizen required within it.

Programme Aims

Drawing on QAA Code for HE and Subject Benchmarks, the programme aims to develop challenging, questioning and adaptable graduates who:

- Demonstrate critical knowledge and a systematic understanding of key contexts, concepts and theoretical approaches in sociology and criminology.
- Demonstrate critical awareness and understanding of social and cultural diversity, inequalities and social exclusion.
- Articulate and justify a range of social and policy approaches that have, and can be used to prevent, address or reduce crime and its adverse impacts on individuals and society at large.
- Critically analyse the processes of globalisation and demographic change and their impact on the operation of social processes and exchange, such as in trafficking and in criminality.
- Develop a critical understanding of comparative social and criminological analysis using appropriate social research methodologies.
- Demonstrate awareness of the distinctive features of sociology and criminology and their limitations in relation to other forms of explanation, and their relationship to other associated disciplines.
- Display independence of thought, as well as critical, analytical and synoptic skills sufficient to pursue further postgraduate study in sociology and cognate disciplines, or careers in a range of areas.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The BA (Hons) Sociology & Criminology programme aligns with BU 2025's distinctive approach to fusion, inspiring learning, advancing knowledge, and enriching society. The programme is designed to improve and enhance departmental education and research excellence, providing our students with an outstanding education and research experience, and preparing them for work in a range of professions, through the academic and applied study of social relations and criminology. The focus on active research engagement underpinning the educational philosophy of our programmes is designed to attract high quality learners. The fusion approach will foster relationships with social oriented and criminal justice agencies in the region and abroad.

In order to achieve BU 2025's strategic plan to ensure academic sustainability and consistent high quality, the Department of Social Sciences and Social Work delivers all its social science programmes as part of an integrated suite which ensures that in addition to providing students with a sound basis in their disciplines of choice, also introduces them to a broad social scientific perspective. Students are able to choose optional units in their own discipline or those of other disciplines within the integrated suite.

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for each unit considers the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations at Level 6 are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound. The word count for the Dissertation unit is 10,000 words, equivalent to 40 credits,

Students who choose to undertake the sandwich placement will engage in a minimum of 30 weeks of full-time work-based learning between Levels 5 and 6. Sandwich students must pass the non-credit bearing placement portfolio assessment between Level 5 and Level 6 in order to graduate.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.

Learning and Teaching Strategies and Methods

The overall programme learning outcomes will be achieved through a range of teaching and learning methods and strategies appropriate to each level.

Subject knowledge and understanding

This will be achieved at each level through the following:

- Lectures that capture students' interest and excite their curiosity about the two subject areas of sociology and criminology
- Discussion-based seminars, designed to facilitate and reinforce students' understanding of the subject areas, and encourage critical and independent thinking
- Access (via Brightspace) to a range of online learning resources, tutorials and subject-specific websites
- Individual or group tutorials, which are usually student-led

At Level 4 the emphasis is on acquiring foundational knowledge of sociology and criminology through six core units.

Level 5 units build on these foundations by developing more in depth theoretical knowledge of each subject area, through the core units Contemporary Social Theory and Ethnographies of Crime and Policing which are supplemented by of sociological and criminological option units. Level 5 also builds students research knowledge and skills through Qualitative Research Skills, and Quantative Skills or Doing Ethnographic Research.

At Level 6 students have a wide range of option units to choose from, enabling them to develop specialist knowledge in specific areas across sociology and criminology in relation to belief, gender, penology, terrorism and conflict. In addition, they undertake a 40-credit dissertation on a topic of their own choice, within which they receive personalised guidance from an appropriate dissertation supervisor.

Programme Specification - Section 2

Intellectual skills

At all levels, students will be encouraged to explore and actively reflect on the nature of sociological and criminological theories and methods, and to think critically about the different kinds of data which emerge from them. This will include encouraging students to develop an informed reflexivity about their own knowledge and perspectives, and challenging their habitual understanding of the world by learning about social processes and human experiences which are unfamiliar to them, both historically and culturally. Lectures, discussion-based seminars, student field trips and online learning resources will provide ample opportunities for students to develop these skills throughout the programme.

At Level 4 students will be introduced to distinctive sociological and criminological methods of acquiring and analysing data, through units such as Introduction to Social Research. They will learn about people and places that are both familiar and unfamiliar to them.

Level 5 seeks to develop students' critical understanding of sociology and criminology, social research methods and the different kinds of data which can result, with opportunities to develop quantitative skills. They will be encouraged to broaden their historical and global awareness of different human experiences, for example through units such as Contemporary Social Theory and Ethnography of Crime and Policing. A range of sociological and criminological option units will allow students to develop pathways to knowledge of health, society, crime and its boundaries.

Building on this foundation, students at Level 6 will increasingly have the opportunity to carry out their own, self-directed study of a particular topic of interest. This will enable them to develop an informed evaluation of different sociological and criminological understandings of the world, including a range of methodological and theoretical approaches. In addition, students will be able to study innovative, contemporary units, such as Politics and Ideology, Terrorism, Protection & Society, Seekers, Believers & Iconoclasts: Sociology of Thought and Anthropology of International Policy and Intervention.

Subject specific skills

Throughout the programme, students will be encouraged to develop ways of thinking and asking sociological, criminological and social policy-informed questions about the world, which build on their knowledge of theoretical approaches and methodologies specific to both subjects. Through taking part in lectures, seminars and self-directed study for various units, they will be expected to develop skills in gathering appropriate evidence and evaluating it in order to address these questions. Several units will also explicitly enable students to develop their awareness of the potential application of sociological and criminological knowledge to a variety of contexts.

At Level 4 students will gain a general, elementary understanding of the kinds of questions sociologists and criminologists pursue in their study of social life and human experiences, as well as an understanding of the theoretical underpinnings of these questions and issues, for instance through units such as Introduction to Social Theory, Introduction to Social Research, Social Inequality and Exclusion and Crime and the Criminal Justice System.

At Level 5 students will broaden and deepen their understanding of social inquiry and expand their understanding of the kinds of methods appropriate to exploring different criminological and sociological questions, for instance through units such as Qualitative Research Skills and Doing Ethnographic Research .

At Level 6 students will increasingly be expected to plan and carry out their own independent investigation of topics of interest to them, using appropriate theoretical and conceptual frameworks and with appropriate academic guidance from lecturers.

Programme Specification - Section 2

Transferable Skills

Through studying this programme, participating in lectures and seminars and undertaking a range of assessments, students will develop key transferable skills, in particular the ability to think independently and evaluate different moral and intellectual positions critically. Through a blend of structured and student-led activities across different units, students will learn to manage their time effectively. They will develop their written and oral presentation skills, and to engage in constructive group discussions.

All Level 4 students will be encouraged to discuss and ask questions about the topics that are the focus of their learning. Guidance from academic staff and librarians will enable them to develop their scholarly and study skills (e.g., in referencing, managing their time, independent learning and making a structured argument). They will be encouraged to plan their time and manage the competing workload of different units. They will also gain experience in presenting their work in oral and written form.

Level 5 students will advance these skills as unit content becomes more challenging and wide-ranging.

Level 6 will make new demands on students in terms of managing an increasingly self-directed workload, including independent study for the dissertation, providing them with opportunities to further develop their communication, time management and scholarly skills.

Assessment Strategies and Methods

The programme will combine a wide-range of different forms of assessment of the intended learning outcomes.

Level 4

At Level 4, subject knowledge and understanding, intellectual skills, subject-specific skills and transferable skills may be assessed by:

- seen and unseen examinations
- written assignments
- presentations
- group study

The methods of assessment employed are well suited to Level 4 intended learning outcomes, including promoting well-rounded, foundational knowledge of the subject areas and skills, and enabling students to develop their written communication and presentation skills, as well as their time planning and management skills.

Level 5

At Level 5, subject knowledge, intellectual skills, subject-specific skills and transferable skills may be assessed in core units by:

- written assignments
- individual written evaluations of group presentations
- seen examination

Programme Specification - Section 2

At this level there may be a greater emphasis on coursework assessment through written assignments and reports than exams within core units. Coursework assessment will enable students to expand on the foundational knowledge and skills gained at Level 4, develop stronger critical and reflexive skills and the ability to think independently, all of which will be important preparation for Level 6 work.

Level 6

At Level 6, core subject knowledge, intellectual skills, subject-specific skills and transferable skills may be assessed by

- written assignments
- portfolio development
- 10,000 word dissertation
- examinations
- oral presentations

At this level, assessments are designed to further enhance students' critical and reflexive skills, their in-depth knowledge of specialist subject areas, competence in independent study and learning, as well as time management and written and oral communication skills.

ADMISSION REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Admissions regulations. These are available at:

<https://intranetsp.bournemouth.ac.uk/pandptest/3a-undergraduate-admissions-regulations.pdf>

PROGRESSION ROUTES

Recognition arrangements provide formally approved entry or progression routes through which students are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply. Please see the Recognition Register for a full list of approved Recognition arrangements and agreed entry criteria.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Assessment Regulations. These can be found at:

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

The programme offers two placement opportunities:

- *Placement Learning unit*- An optional Placement Learning Unit (20 days or 150 hours) will be available at Level 5.
- *Practice Placement (Sandwich option)* - A 30-week placement taken over the course of a full-time academic year at Level P.
- Further details are available in the unit specifications and placement handbooks.

Students wishing to undertake placements through either route **will be expected to actively seek out opportunities for placement and make arrangements to undertake them** in a way which meets all appropriate guidelines.
