<tr>
<td>Bournemouth University</td>
<td>Faculty of Science and Technology</td>
</tr>
</tbody>
</table>

**Final award(s), title(s) and credits**

BSc (Hons) Games Design – 120 (60 ECTS) Level 4 / 120 (60 ECTS) Level 5 / 120 (60 ECTS) Level 6 credits

**Intermediate award(s), title(s) and credits**

Dip HE Games Design – 120 (60 ECTS) Level 4 / 120 (60 ECTS) Level 5 credits

Cert HE Games Design – 120 (60 ECTS) Level 4 credits

**UCAS Programme Code(s) (where applicable and if known)**

G601

**HESA JACS (Joint Academic Coding System) Code(s) and percentage split per programme/pathway**

I600 Games (42%)

I620 Computer Games Design (58%)

**External reference points**

- UK Quality Code for Higher Education;
- Part A: Setting and maintaining academic standards;
- Chapter A1: UK and European reference points for academic standards (October 2013) - incorporates the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (Qualification Frameworks);
- QAA Honours Degree Subject Benchmark Statement: Computing (February 2016)
- TIGA standards and guidelines.

**Professional, Statutory and Regulatory Body (PSRB) links**

Awaiting accreditation from TIGA.

**Places of delivery**

Bournemouth University

**Mode(s) of delivery**

Full-time, Full-time sandwich

**Language of delivery**

English

**Typical duration**

3 years full-time / 4 years full-time sandwich. Level 4: 1 year, Level 5: 1 year, Level 6: 1 year.

**Date of first intake**

September 2017

**Expected start dates**

September

**Maximum student numbers**

Not applicable

**Placements**

30 week sandwich placement. Students are expected to search for suitable placement opportunities, with the support of the Faculty placements team and placements tutor.

8 week placement (for FULL TIME – not sandwich)

**Partner(s)**

Not applicable

**Partnership model**

Not applicable

**Date of this Programme Specification**

April 2019. Applies to all levels from September 2019.

**Version number**

v1.4-0919

**Approval, review or modification reference numbers**

E2017010 – 21/04/2017

NM161706 – 02/05/2017

FST161715 – 28/06/2017

P161701 – 06/17/2017

FST181905 – 05/12/2018

BU 1819 01

### Progression requirements: Requires 120 credits at Level 5.  
### Exit qualification: Dip HE Games Design (requires 120 credits at Level 4 and 120 credits at Level 5)

## Year 3/Level P - Optional placement year in industry/business

Optional sandwich placement is taken between levels 5 and 6.  

### Progression requirements: Satisfactory completion of a minimum 30-week placement in industry. Students who do not choose to undertake the optional sandwich placement may progress directly from Level 5 to Level 6.
### Year 3/4/Level 6

Students are required to complete all 4 core units.

**Exit qualification:** BSc (Hons) Games Design

**Sandwich UG award:** Requires 120 credits at Level 4, 120 credits at Level 5, 120 credits at Level 6 and successful completion of a placement year

**Full-time UG award:** Requires 120 credits at Level 4, 120 credits at Level 5 and 120 credits at Level 6
AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme aims to develop critically informed, agile and resourceful graduates, who can:

- develop understanding of key issues in games development using modern computer game engines, across the multiple gaming platforms (mobile, console, etc.);
- develop principles of gameplay mechanics and level design for a variety of game genres;
- apply design principles for the development of rich narrative and emotional experiences;
- produce producing compelling creative 3D environments, including all aspects of game asset creation: 3D models, animations, music and audio, etc.;
- produce interactive and immersive entertainment experiences;
- produce computer games in a legally, ethically and critically-informed manner;
- work in multi-disciplinary (creative and technical) teams through the development of computer games;
- combine the critical faculties that derive from a traditional academic degree with the professional skills and flexibility needed to get the best jobs in the games development industry;
- manage their own personal development and lifelong learning.

BSc (Hons) Games Design is a course that focusses on the creative design and production aspects of computer games development. This course aims at the development of compelling interactive and immersive gaming experiences; as well as the design principles of gameplay mechanics and level design for a variety of game genres applied to the creation of rich narrative and emotional experiences. The course will also involve working in multi-disciplinary (creative and technical) teams through the development of computer games.
ALIGNMENT WITH THE UNIVERSITY’S STRATEGIC PLAN

The BSc (Hons) Games Design programme is informed by and aligned with Bournemouth University’s 2012-18 strategic plan and the fusion of excellent teaching, world-class research and professional practice that is at the heart of the institution’s visions and values. Students are supported by academics with a wealth of industry experience, many of whom are actively engaged in the production of Computer Games Tools and Technologies for a wide range of commercial clients. Academics delivering the programme are actively engaged in cutting edge research, while students are encouraged to participate in a range of co-creation and co-publication projects. The programme’s innovative pedagogic approach offers students the opportunity to learn by engaging in a series of practical, industry focused tasks. These are aimed at equipping students with the full range of skills necessary to succeed in the games design environment, and are informed by the academic team’s own industrial experience as well as by a network of industry contacts, who will also contribute directly to the programme by delivering guest lectures.

LEARNING HOURS AND ASSESSMENT

- Semesterised (CAS compliant)
- Expected contact time is 40hrs per 20cr Unit (if an exception needs to be made, we will provide a minimum of 40hrs)

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound.

Students who choose to undertake the sandwich placement after Level 5 will engage in 30 weeks of full-time work-based learning between Levels 5 and 6, students who do not undertake the sandwich placement will be eligible to progress directly on to Level 6.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate per the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.

To ensure that the practical aspects of the programme are appropriately aligned with current industry practice, and to provide students with a broad range of high quality learning opportunities aimed at enhancing employability; some units may be jointly delivered by a mixture of both BU lecturers and appropriately qualified industrial professional practitioners.
INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES STUDENTS TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

PROGRAMME AND LEVEL 6 INTENDED PROGRAMME OUTCOMES

A: Subject knowledge and understanding

This programme provides opportunities for students to develop and demonstrate knowledge and understanding of:

<table>
<thead>
<tr>
<th>A1</th>
<th>relevant theories, concepts and principles pertinent to games design;</th>
</tr>
</thead>
<tbody>
<tr>
<td>A2</td>
<td>the tools, techniques and industry relevant software with which games designers operate;</td>
</tr>
<tr>
<td>A3</td>
<td>appropriate research methodologies in carrying out independent research in computer games and produce a report demonstrating evidence of critical thinking;</td>
</tr>
<tr>
<td>A4</td>
<td>the multi-disciplinary nature of games design and the need to apply concepts from a range of scientific principles;</td>
</tr>
<tr>
<td>A5</td>
<td>the full life-cycle of a computer games project;</td>
</tr>
<tr>
<td>A6</td>
<td>an entrepreneurial understanding of the business and financial constraints in computer game development.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:

- **Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):**
  - lectures (A1-A6);
  - seminars (A1-A6);
  - practical tutorial or lab sessions (A1-A6);
  - directed reading (A1-A6);
  - use of the VLE (A6);
  - independent study time (A1-A6);
  - personal development (A1-A6);
  - independent research (for dissertation) (A3).

- **Assessment strategies and methods (referring to numbered Intended Learning Outcomes):**
  - coursework (A1-A6);
  - dissertation (A3).

B: Intellectual skills

This programme provides opportunities for students to:

<table>
<thead>
<tr>
<th>B1</th>
<th>critically evaluate theory and practice of design principles;</th>
</tr>
</thead>
<tbody>
<tr>
<td>B2</td>
<td>analyse and synthesise information for computer-based systems;</td>
</tr>
<tr>
<td>B3</td>
<td>integrate and synthesise evidence from a range of sources to support findings, proposed solutions and hypotheses;</td>
</tr>
<tr>
<td>B4</td>
<td>effectively deploy appropriate methods and tools for the definition, construction and development of functioning computer games;</td>
</tr>
<tr>
<td>B5</td>
<td>explain fundamental design paradigms and contextual use cases, with knowledge of underpinning benefits and limitations.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme outcomes:

- **Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):**
  - lectures (B1-B5);
  - lab sessions (B1-B5);
  - directed reading (B1-B5);
  - use of the VLE (B4);
  - independent study time (B1-B5);
  - personal development (B1-B5);
  - independent research (B3).

- **Assessment strategies and methods (referring to numbered Intended Learning Outcomes):**
  - coursework (B1-B5);
  - dissertation (B3).
C: Practical skills

This programme provides opportunities for students to:

C1 demonstrate confidence and competence in the use of theory, practice and tools to specify, design and implement computer games;

C2 conduct research into business and management issues;

C3 use appropriate skills to communicate effectively in business situations;

C4 work as part of a development team with an implicit understanding of appropriate and intrinsic methodologies;

C5 demonstrate confidence and competence in the use of core analytical techniques and design tools.

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:

Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):

- lectures (C3);
- seminars (C1-C5);
- practical tutorial or lab sessions (C1-C5);
- independent study time (C2, C5);
- personal development (C1-C5);
- independent research (C2).

Assessment strategies and methods (referring to numbered Intended Learning Outcomes):

- coursework (C1-C5).

D: Transferable skills

This programme provides opportunities for students to:

D1 perform effectively when working in collaboration with others; deploy a range of interpersonal skills including effective listening, negotiating, persuasion and presentation;

D2 undertake research and demonstrate literature review skills;

D3 demonstrate openness and sensitivity to diversity in terms of other people, cultures and business and management issues;

D4 manage their own motivation, tasks and behaviour in enterprising, innovative and professionally appropriate ways;

D5 analyse and process game data;

D6 devise innovation to practical design problems.

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:

Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):

- lectures (D5, D6);
- seminars (D1-D6);
- practical tutorial or lab sessions (D1-D6);
- directed reading (D1-D6);
- use of the VLE (D5, D6);
- independent study time (D2, D4);
- personal development (D1, D4);
- independent research (D2).

Assessment strategies and methods (referring to numbered Intended Learning Outcomes):

- coursework (D1-D6);
- dissertation (D2, D4).
### LEVEL 5 / Dip HE INTENDED LEVEL OUTCOMES

#### A: Knowledge and understanding

This level provides opportunities for students to develop and demonstrate knowledge and understanding of:

<table>
<thead>
<tr>
<th>Intended Learning Outcome</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A1</td>
<td>relevant theories, concepts and principles pertinent to games design (** and games software engineering);</td>
</tr>
<tr>
<td>A2</td>
<td>the tools, techniques and industry relevant software with which games developers operate;</td>
</tr>
<tr>
<td>A3</td>
<td>appropriate research methodologies to produce a report demonstrating evidence of implementation strategies and critical thinking;</td>
</tr>
<tr>
<td>A4</td>
<td>the multi-disciplinary nature of games design (** and games software engineering);</td>
</tr>
<tr>
<td>A5</td>
<td>the integration of sub-systems into games and game engines;</td>
</tr>
<tr>
<td>A6</td>
<td>an entrepreneurial understanding of the business and financial constraints in computer game development.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:

- Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):
  - lectures (A1- A6);
  - seminars (A1 – A6);
  - practical tutorial or lab sessions (A1-A6);
  - directed reading (A1 – A6);
  - use of the VLE (A6);
  - independent study time (A1- A6);
  - personal development (A1-A6);
  - independent research (A3).

- Assessment strategies and methods (referring to numbered Intended Learning Outcomes):
  - coursework (A1-A6);
  - examination (A1, A4).

#### B: Intellectual skills

This level provides opportunities for students to:

<table>
<thead>
<tr>
<th>Intended Learning Outcome</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>B1</td>
<td>feedback on theory and practice of design (** and programming) principles;</td>
</tr>
<tr>
<td>B2</td>
<td>analyse information on design, modelling and animation applied to a variety of game components;</td>
</tr>
<tr>
<td>B3</td>
<td>show evidence from a range of sources to support findings and hypotheses;</td>
</tr>
<tr>
<td>B4</td>
<td>deploy appropriate methods and tools for the definition, construction and development of functioning computer games;</td>
</tr>
<tr>
<td>B5</td>
<td>explain intermediate games design (** and programming) paradigms and contextual use cases.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme outcomes:

- Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):
  - lectures (B1-B5);
  - seminars (B1-B5);
  - practical tutorial or lab sessions (B1-B5);
  - directed reading (B1-B5);
  - use of the VLE (B4);
  - independent study time (B1-B5);
  - personal development (B1-B5);
  - independent research (B3).

- Assessment strategies and methods (referring to numbered Intended Learning Outcomes):
  - coursework (B1-B5);
  - examination (B1, B5).

#### C: Practical skills

This level provides opportunities for students to:

The following learning and teaching and assessment strategies and methods enable students to achieve and to
<table>
<thead>
<tr>
<th>Intended Learning Outcomes (C)</th>
<th>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</th>
</tr>
</thead>
<tbody>
<tr>
<td>C1 use a range of established techniques to implement a design solution;</td>
<td>• lectures (C3); • seminars (C1-C5); • practical tutorial or lab sessions (C1-C5); • independent study time (C2, C5); • personal development (C1-C5); • independent research (C2).</td>
</tr>
<tr>
<td>C2 conduct research into business and management issues;</td>
<td></td>
</tr>
<tr>
<td>C3 use appropriate skills to communicate effectively in business situations;</td>
<td></td>

</tbody>
</table>
## LEVEL 4 / Cert HE INTENDED LEVEL OUTCOMES

### A: Knowledge and understanding
This level provides opportunities for students to develop and demonstrate knowledge and understanding of:

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A1</td>
<td>foundational theories, concepts and principles pertinent to games design;</td>
</tr>
<tr>
<td>A2</td>
<td>the tools, techniques and industry relevant software with which games designers operate;</td>
</tr>
<tr>
<td>A3</td>
<td>producing a report demonstrating evidence of critical thinking;</td>
</tr>
<tr>
<td>A4</td>
<td>a range of scientific principles;</td>
</tr>
<tr>
<td>A5</td>
<td>the life-cycle of a computer games project.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:

- **Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):**
  - lectures (A1- A5);
  - seminars (A1 – A5);
  - practical tutorial or lab sessions (A1-A5);
  - directed reading (A1 – A5);
  - independent study time (A1-A5);
  - personal development (A1-A5);
  - independent research (A3).

- **Assessment strategies and methods (referring to numbered Intended Learning Outcomes):**
  - coursework (A1-A5).

### B: Intellectual skills
This level provides opportunities for students to:

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>B1</td>
<td>critically evaluate theory and practice of games design principles;</td>
</tr>
<tr>
<td>B2</td>
<td>analyse information for computer-based systems;</td>
</tr>
<tr>
<td>B3</td>
<td>start to undertake evidence-based research;</td>
</tr>
<tr>
<td>B4</td>
<td>gain experience with tools for the definition, construction and development of functioning computer games;</td>
</tr>
<tr>
<td>B5</td>
<td>be introduced to games design paradigms.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme outcomes:

- **Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):**
  - lectures (B1-B5);
  - seminars (B1-B5);
  - practical tutorial or lab sessions (B1-B5);
  - directed reading (B1-B5);
  - use of the VLE (B4);
  - independent study time (B1-B5);
  - personal development (B1-B5);
  - independent research (B3).

- **Assessment strategies and methods (referring to numbered Intended Learning Outcomes):**
  - coursework (B1-B5).
## C: Practical skills

This level provides opportunities for students to:

<table>
<thead>
<tr>
<th>C1</th>
<th>identify knowledge of industry-standard game production software and components;</th>
</tr>
</thead>
<tbody>
<tr>
<td>C2</td>
<td>review understanding of modelling and design principles used in computer games;</td>
</tr>
<tr>
<td>C3</td>
<td>identify the fundamental components and operations of computer systems;</td>
</tr>
<tr>
<td>C4</td>
<td>recognise an understanding of development methodologies;</td>
</tr>
<tr>
<td>C5</td>
<td>produce appropriate design documents and creative assets.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level learning outcomes:

- lectures (C3);
- seminars (C1-C5);
- practical tutorial or lab sessions (C1-C5);
- independent study time (C2, C3, C5);
- personal development (C1-C5).

### Assessment strategies and methods

- coursework (C1-C5).

## D: Transferable skills

This level provides opportunities for students to:

<table>
<thead>
<tr>
<th>D1</th>
<th>start to work in teams, gaining insight into tenets of design practice;</th>
</tr>
</thead>
<tbody>
<tr>
<td>D2</td>
<td>undertake directed research;</td>
</tr>
<tr>
<td>D3</td>
<td>manage their own time;</td>
</tr>
<tr>
<td>D4</td>
<td>address problems utilising design principles;</td>
</tr>
<tr>
<td>D5</td>
<td>approach practical design problems.</td>
</tr>
</tbody>
</table>

The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level learning outcomes:

- lectures (D4, D5);
- seminars (D1-D5);
- practical tutorial or lab sessions (D1-D5);
- directed reading (D1-D5);
- use of the VLE (D4, D5);
- independent study time (D2, D4);
- personal development (D1, D4);
- independent research (D2).

### Assessment strategies and methods

- coursework (D1-D5).
ADMISSION REGULATIONS

The regulations for this programme are the University’s Standard Undergraduate Admission Regulations with the following exceptions:

- applicants for whom English is not their first language must provide evidence of qualifications in written and spoken English. For BSc (Hons) Games Design students who do not have an appropriate UK English Language qualification, the English language entry requirement is IELTS (Academic) 6.0 with a minimum of 5.5 in each component, or equivalent. Equivalent English language qualifications as set out in document ‘3H - Standards of English for International Students and English Language Qualifications’ will be accepted;

The University’s standard Admission Regulations are available within section 3.1 of the ARPP on the BU website: https://intranetsp.bournemouth.ac.uk/pandptest/3a-undergraduate-admissions-regulations.doc.

Articulation:

Students who have successfully completed the Bournemouth University International College (Kaplan) Computing Pathway with a minimum of 50% course average and 60% in English will be automatically accepted for entry, without advanced standing, to Level 4 of BSc (Hons) Games Design.

PROGRESSION ROUTES

Recognition arrangements provide formally approved entry or progression routes through which students are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply.

Please see the Recognition Register (https://intranetsp.bournemouth.ac.uk/pandptest/7J_Recognition_Register_Public.xlsx) for a full list of approved Recognition arrangements and agreed entry criteria.

In order to take advantage of exciting new approaches to learning and teaching, as well as developments in industry, the current, approved Articulation/Recognition/Progression route(s) for this programme may be subject to change. Where this happens students will be informed and supported by the Faculty as early as possible.

ASSESSMENT REGULATIONS

The regulations for this programme are the University’s Standard Undergraduate Assessment Regulations. The University’s Standard Undergraduate Assessment Regulations are available from: https://intranetsp.bournemouth.ac.uk/pandptest/6a-standard-assessment-regulations-undergraduate.pdf

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

Placements; this programme offers an optional placement year. This bears no credits. The duration of the placement is normally 30 weeks of supervised work experience and the aims of the placement year are to give the students experience of working within an appropriate professional environment which will contribute to their potential employability, mobility and global awareness. Completion of the four year degree, i.e. one with a 30-week placement included, will entitle students to a ‘sandwich award’. Shorter (also optional) placements of 8 weeks are also possible although the sandwich award is then no longer an option. Completion of the three-year full-time degree will, instead, entitle students to a ‘full-time award’.

The placement is recognised at Bournemouth University as adding considerable value to graduate profiles and students are very strongly advised to follow the sandwich route. The non-sandwich route is designed for mature students who have experience of the world of work and who may need to
complete their course in three years for financial (or other) reasons. In some cases, on submission of relevant evidence, such students may be eligible for Recognition of Prior Learning (RPL). This will provide them with exemption from the placement year but will still entitle them to a sandwich degree.

The placement draws on some or all the units studied on the first two Levels (4 and 5) of this programme. Successful Level 4 and 5 completion is compulsory before proceeding to the 30-week or 8-week placement. It provides the opportunity for the student to develop their abilities and understanding of related subjects, as well as providing a platform for successful entry into the relevant profession (following graduation). It can also make a major contribution to the understanding of the final Level (6) units, further develops final projects or dissertation research by utilising the context of the work experience as appropriate and, finally, significantly enhances students’ prospects of future employment.

Further information on the Department’s placements policy and procedure can be sourced in the Creative Technology Placements Handbook and also here (for Bournemouth University policy on the same subject): [http://intranetsp.bournemouth.ac.uk/pandptest/4k-placements-policy-and-procedure.DOCX](http://intranetsp.bournemouth.ac.uk/pandptest/4k-placements-policy-and-procedure.DOCX)

</table>
A – Subject Knowledge and Understanding
This programme provides opportunities for students to develop and demonstrate knowledge and understanding of:

1. relevant theories, concepts and principles pertinent to games design;
2. the tools, techniques and industry relevant software with which games designers operate;
3. appropriate research methodologies in carrying out independent research in computer games and produce a report demonstrating evidence of critical thinking;
4. the multi-disciplinary nature of games design and the need to apply concepts from a range of scientific principles;
5. the full life-cycle of a computer games project;
6. an entrepreneurial understanding of the business and financial constraints in computer game development.

B – Intellectual Skills
This programme provides opportunities for students to:

1. critically evaluate theory and practice of design principles;
2. analyse and synthesise information for computer-based systems;
3. integrate and synthesise evidence from a range of sources to support findings, proposed solutions and hypotheses;
4. effectively deploy appropriate methods and tools for the definition, construction and development of functioning computer games;
5. explain fundamental design paradigms and contextual use cases, with knowledge of underpinning benefits and limitations.

C – Subject-specific/Practical Skills
This programme provides opportunities for students to:

1. demonstrate confidence and competence in the use of theory, practice and tools to specify, design and implement computer games;
2. conduct research into business and management issues;
3. use appropriate skills to communicate effectively in business situations;
4. work as part of a development team with an implicit understanding of appropriate and intrinsic methodologies;
5. demonstrate confidence and competence in the use of core analytical techniques and design tools.

D – Transferable Skills
This programme provides opportunities for students to:

1. perform effectively when working in collaboration with others; deploy a range of interpersonal skills including effective listening, negotiating, persuasion and presentation;
2. undertake research and demonstrate literature review skills;
3. demonstrate openness and sensitivity to diversity in terms of other people, cultures and business and management issues;
4. manage their own motivation, tasks and behaviour in enterprising, innovative and professionally appropriate ways;
5. analyse and process data and information;
6. devise innovation to practical design problems.
