AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme aims to develop critically informed, agile and resourceful graduates, who:

- Possess a coherent, detailed knowledge and understanding of the study of sport coaching and its underpinning theories, principles and concepts, in order to enhance sport and society through coaching practice
- Critically evaluate a range of sport coaching contexts and systematically apply knowledge to conduct research and provide appropriate interventions or solutions in an independent manner
- Demonstrate practical, intellectual and personal skills associated with ethical and sustainable coaching practice to be able to lead and influence in a range of contexts and scenarios.
- Possess key qualities such as initiative, personal responsibility, critical thinking and decision making to successfully transition into the work place or into further study

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

BSc (Hons) Sport Coaching is aligned with Bournemouth University's 2025 (BU2025) strategic vision to be recognised world-wide as a leading university for inspiring learning, advancing knowledge and enriching society through the fusion of education, research and practice. Whilst all BU2025 themes are reflected in aspects of this Sport Coaching degree programme, those best reflected are the themes of *Health and Well-being* and Business and *Economic Sustainability*. The BU2025 core values of inclusivity and responsibility and of impacting society are explicitly reflected in the aims and outcomes of the Sport Coaching degree which seeks to enhance sport and society through ethical and sustainable coaching practice in a range of contexts.

This Sport Coaching programme embeds a distinctive *Fusion learning approach* into content delivery and assessment. The curriculum is both research-led and strongly practice based. It contains opportunities for students to co-create and engage with industry including local community groups and elite sport clubs through learning and assessment strategies. There is a comprehensive range of co-curricular learning opportunities for students to enhance their experience and develop transferable skills for employment or further study, and all students have the opportunity to engage in a placement (minimum 6 weeks) and international study. Crucially the Sport Coaching degree provides clear opportunities for interdisciplinary learning within and across units of study offered from BSc (Hons) Sport and Exercise Science and BSc (Hons) Sport Management whilst maintaining a distinctive sport coaching focus that is underpinned by BU2025 values. The Sport Coaching curriculum supports students to develop graduate attributes including collaboration and teamwork, citizenship and societal contribution, global outlook and innovation and entrepreneurship.

Programme Specification

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.

PROGRESSION ROUTES

Recognition arrangements provide formally approved entry or progression routes through which students are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply. Please see the [Recognition Register](#) for a full list of approved Recognition arrangements and agreed entry criteria.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Assessment Regulations

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

All undergraduate students will undertake a form of placement as it is recognised that placement is a key driver of employability. The length of placement is optional. Students can complete a one-year (minimum 30 week) placement as part of a four year degree programme or a summer (minimum 6 week) placement as part of a three year degree. Placements are not defined as a unit. Placements are normally required to be completed prior to progression to Level 6.
