PROGRAMME STRUCTURE

| Programme Award and Title: Graduate Certificate in Enhanced Clinical Practice | | | | | | | | | |
|---|-----------------|--------------------------|-------------------------------|---------------|---------------|----------|--|------------------------|--|
| Level 6 Students are required to complete all units of the programme. No option units are linked to the programme. Please note Unit 3- Leadership and Change in Enhanced Practice will launch in year 1 but straddle into year 2 | | | | | | | | | |
| Unit Name | Core/ Option | No. of Credits | Assessment Element Weightings | | | | Expected Contact hours per unit | Unit Version No. | HECoS Code (plus balanced or major/ minor load) |
| | | | Exam 1 | Exam 2 | Cwk 1 | Cwk 2 | | | |
| * Unit 1 Enhanced Assessment Skills for Clinical Practice | Core | 20 | Pass/ Fail | Pass/ Fail | 100% | | 30 | 1.1 | |
| * Unit 2 Clinical Reasoning and Decision Making in Enhanced Clinical Practice | Core | 20 | | | 100% | | 30 | 1.0 | |
| * Unit 3 Leadership and Change in Enhanced Clinical Practice | Core | 20 | 100% | | | | 40 | 1.1 | |
| * Unit 4 Guiding Professional Development in Enhanced Clinical Practice | Core | Non Credit Bearing | | | Pass/ Fail | | 25 | 1.0 | |
| Exit qualification: Graduate Certificate in Enhanced Clinical Practice Please note, units with * are already approved and delivered by FHSS Apprentices who successfully complete the End Point Assessment are eligible for the award of the apprenticeship, whether or not they pass the credit bearing units listed above. In this instance they will receive the award of the IATE apprenticeship, but not the additionally added credit bearing qualification. | | | | | | | | | |

AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- articulate how the programme will enable apprentices to demonstrate the Knowledge, Skills and Behaviours of the apprenticeship standard;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme aims to develop analytical, innovative, and knowledgeable graduates, who:

- are able to work to an enhanced level of practice within a defined area of expertise
- can utilise enhanced assessment skill and clinical judgement within their specific field
- are able to manage a discrete aspect of a patient's care; devising, actioning and evaluating complex care plans
- contribute effectively to the holistic journey of a patient through the wider healthcare setting, assuming an important role in the multi-disciplinary care offered
- contribute to the evolution of their clinical environment through education of themselves and others, supplying clinical leadership and effecting service improvement

The programme aligns with the Institute for Apprenticeships & Technical Education (IATE) 'Enhanced Clinical Practitioner' apprenticeship (ST0895) approved for delivery in 2021. This programme both offers a development route for new and existing specialist practitioners, but also an opportunity for service providers to delineate between Enhanced and Advanced clinical practice. This also aligns with declared NHS workforce planning.

The programme can be completed at both level 6 or level 7, reflecting the variable requirements of the target vocational environments. Successful completion of level 6 study can be awarded as Graduate Certificate in Enhanced Clinical Practice or may contribute credits to a BSc.

Graduates of the programme at level 6 will have a clear academic progression route to the existing MSc Advanced Clinical Practice Apprenticeship. This synergises well with BU fusion strategy and with declared intentions of DoH. Practitioners following this trajectory could include Advanced Clinical Practitioners, Nurse and Allied Health Practitioner Consultants and Specialist Interventionists. Please note, due to the flexible nature of emergent healthcare, these examples represent only a small selection of potential clinical advancement trajectories. For those students choosing to pursue a managerial progression route, Bournemouth University's Senior Leadership Apprenticeship offers opportunities for advancement.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The programme is informed by and aligned with BU 2025 strategic plan and fusion agenda. Information about BU vision, values and strategic plan can be found here ([BU2025: our vision, values and strategic plan | Bournemouth University](#)).

Values

Striving to excel within a defined clinical field lies at the heart of the Enhanced Clinical Practitioner programme. Students will be guided on how to achieve this and challenged to reach their potential. Sustaining this level of excellence after conclusion of the programme lies at the core of the syllabus. It is envisioned that graduates will become ambassadors for BU's commitment to supporting and sustaining clinical excellence.

Programme Specification - Section 2

The Enhanced Practitioner programme focuses on giving students a firm understanding of the assessment and diagnostic process. This knowledge can be employed to widely varying areas of speciality within healthcare. Sharing experiences of assessment and management of patients from the full spectrum of healthcare will form a cornerstone of the programme. The programme will be valuable to nurses and allied health professionals. Representing this diversity within the learning space will benefit all who contribute to the course.

Students on the Enhanced Clinical Practitioner programme will be empowered to become agents of change within their clinical environment. They will explore topics of advocacy, leadership, and service improvement throughout the programme, becoming dynamic and effective experts within their clinical field.

The programme will focus on collaborate learning, encouraged through topical debate. In the clinical space and in the learning environment, students will be challenged to consider their evolving role as educators and role-models.

Fusion Learning

The Enhanced Clinical Practitioner programme will be delivered in a dynamic fashion. Students will be encouraged to share their personalised experience of enhanced practice and reflecting on how the experience of other students influences their own practice. The learning environment will constitute a safe space to explore concepts of assessment, diagnostics, and clinical management. A portfolio of learning approaches will be utilised through employment of simulation, case review, sharing of experiences and planning for service improvement. Formative assessment will feature as a tool for insight throughout. Summative assessments will be linked to learning objectives in a transparent and applicable fashion.

The essential role of mentors in the clinical environment will be supported and empowered through the apprenticeship framework. Mentors and students will be aided in applying theoretical concepts to the clinical space, with guidance available for clinical partners in maximising placement learning.

Strategic Goals

The Enhanced Clinical Practitioner programme will position mentors, students and educators as partners in learning, with support for all parties to ensure effective collaboration. In this way, BU will be positioned well at the heart of an Enhanced Clinical Practice network, encouraging collaboration throughout the programme duration, this will contribute to promoting BU as a partner of choice for apprenticeship based clinical programmes in the region.

LEARNING HOURS AND ASSESSMENT

Apprentices will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research apprentices.

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. For units bearing academic credits, the commencing credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the apprentice, including lectures, seminars, assessment and independent study, leading to achievement of associated subject matter. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits. Units of study that do not bear academic credits will contain content requiring less than 200 hours of study and will have the non-credit bearing status reflected in the method of assessment.

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e., formative and summative assessment) and the taught elements and independent study workload (i.e., lectures, seminars, preparatory work, practical activities, reading and critical reflection and learning in practice). Students attending the programme will be required to hold a permanent employment in an appropriate clinical area. This will be defined as an area able to support

Graduate Certificate in Enhanced Clinical Practice

Programme Specification - Section 2

the student with exposure to learning opportunities within a defined clinical field and are able to, with agreement by their employer, support the student and nominated mentor in the learning process. The mentor may be clinician of appropriate knowledge and ability within the practice area. A qualification in mentorship or supervision would be desirable; active engagement with the student in their practice learning throughout the programme is a required element of the programme.

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound. To capture the range of skills required of an Enhanced Clinical Practitioner, alternative assessment methods will be also employed, both in formative and summative assessment. Where employed these will be relative and reflective of taught content. These will include Observed Structured Clinical Examination (OSCE), case study presentation and pitch-and-sell. Each alternate examination structure will conform with equivalency to written examination.

APPRENTICESHIP KNOWLEDGE, SKILLS AND BEHAVIOURS

The knowledge, skills and behaviours (KSBs) of the apprenticeship standard are evaluated and assessed at the final level of the apprenticeship (e.g., level 5, 6 or 7 depending on the apprenticeship standard). This applies to all judgements made on the KSBs from the skills-scan at the start of the apprenticeship to the end point assessment.

| Knowledge | Off-the-job training | Programme ILOs | On-the-job training |
|--|--|--|---------------------|
| Tools and techniques used to systematically search, select and present evidence | Unit 1- Enhanced Assessment Skills for Clinical Practice 30% Unit 3- Leadership and Change in Enhanced Clinical Practice 30% Unit 4- Guiding Professional Development in Enhanced Clinical Practice 20% | A5, A7, A8 B1 C5 D4, D5, D7 | 20% |
| Techniques to critically appraise evidence such as local and national quality standards and frameworks and ways to relate this to own practice | Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 30% Unit 3- Leadership and Change in Enhanced Clinical Practice 30% Unit 4- Guiding Professional Development in Enhanced Clinical Practice 10% | A5, A7, A8 B1 C5 D4, D5, D7 | 30% |
| Requirements of their on-going professional registration and code of conduct in relation to their scope of practice such as when and how to escalate or refer in line with defined scope of practice | Unit 1- Enhanced Assessment Skills for Clinical Practice 40% | A2, A7, A8 B4, B5 C6, C7 D3, D5, D6 | 60% |
| How to appraise the relevance of available tools and techniques to the clinical situation and own scope of practice | Unit 1- Enhanced Assessment Skills for Clinical Practice 30% Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 30% | A5, A7, A8 B1 C5 D4, D5, D7 | 40% |

| Identify and manage risk to patient safety and others in an unpredictable and complex environment | Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 50% | A5, A7, A8 B1 C5 D4, D5, D7 | 50% |
| Counsel patients, family, carers and others to manage psychological well-being of self and others | Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 40% | A2, A4, A5, A6 B2, B4, B6 C2, C3 D1, D2, D4 | 60% |
| Contribute to efficient resource management within the workplace | Unit 3- Leadership and Change in Enhanced Clinical Practice 50% | A7, A8 B4, B5, B6 C5, C6, C7 D5, D6, D7 | 50% |
| Plan, prioritise and deliver enhanced clinical care within a defined resource | Unit 1- Enhanced Assessment Skills for Clinical Practice 20% Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 20% | A7 B4, B5 C3, C4, C5, C7 D3, D5, D6, D7 | 60% |
| Contribute to the drafting of business cases or project proposals | Unit 3- Leadership and Change in Enhanced Clinical Practice 70% Unit 4- Guiding Professional Development in Enhanced Clinical Practice 10% | A7, A8 B4, B5, B6 C5, C6, C7 D5, D6, D7 | 20% |
| Provide mentorship, opportunity for peer-learning and constructive feedback to guide, support, motivate and develop others in the multidisciplinary team | Unit 3- Leadership and Change in Enhanced Clinical Practice 50% | A7, A8 B4, B5, B6 C5, C6, C7 D5, D6, D7 | 50% |
| Contribute to the appraisal of individuals in the multidisciplinary team | Unit 3- Leadership and Change in Enhanced Clinical Practice 50% | A2, A7, A8 B4, B5 C6, C7 D3, D5, D6 | 50% |

| Behaviours | Off-the-job training | Programme ILOs | On-the-job training |
|--|--|--|----------------------------|
| Treat people with dignity, respecting individual's diversity, beliefs, culture, needs, values, privacy and preferences | Unit 1- Enhanced Assessment Skills for Clinical Practice 20% Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 20% Unit 3- Leadership and Change in Enhanced Clinical Practice 20% | A2, A4, A5, A6 B2, B4, B6 C2, C3 D1, D2, D4 | 40% |
| Show respect and empathy for those you work with | Unit 1- Enhanced Assessment Skills for Clinical Practice 20% Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 20% Unit 3- Leadership and Change in Enhanced Clinical Practice 20% | A2, A7, A8 B4, B5 C6, C7 D3, D5, D6 | 40% |
| Be adaptable, reliable and consistent | Unit 1- Enhanced Assessment Skills for Clinical Practice 20% Unit 2- Clinical Reasoning and Decision Making in Enhanced Clinical Practice 20% Unit 3- Leadership and Change in Enhanced Clinical Practice 20% | A7 B4, B5 C3, C4, C5, C7 D3, D5, D6, D7 | 40% |

ENGLISH, MATHS AND BRITISH VALUES

| Unit | English | Maths | British values |
|--|--|--|--|
| Enhanced Assessment in Clinical Practice | Introduction to use of clinically focused language in descriptors of conditions and symptoms. Introduction to the relation between language and accuracy in definition and communication | Use of clinical scoring tools in the categorisation of patient condition or disease severity | Exploration of diverse baseline of health in the general population and accommodation of this to ensure equal access to reliable health assessment |
| Clinical Reasoning and Decision Making in Enhanced Clinical Practice | Discussion of the need to translate language to ensured understanding of complicated concepts by patients. Further exploration of communication methods to avoid error | Use of different values in the examination of clinical data and its application to the diagnostic process | Exploration of the concept of autonomy and personal agency in therapeutic direction |
| Leadership and Change in Enhanced Clinical Practice | Exploring the role of language in the motivation of individuals and organisations to elicit change. The use of language in building a compelling argument | Exploring the role of resource management, including time and budget, in rationalising change in the clinical environment | Discussing how to design service provision to avoid disenfranchisement of client groups |
| Guiding Professional Development in Enhanced Clinical Practice | Navigate the process of evaluating and communicating professional and personal growth to others | Demonstrating skill in employment of maths ability while leading and/or contributing to the leadership of a clinical service | Representation of the diverse contribution to British Values made by positions of expertise in healthcare |

SAFEGUARDING, PREVENT AND CAREERS SUPPORT

| Unit | Safeguarding | Prevent | Careers support |
|--|--|---|--|
| Enhanced Assessment in Clinical Practice | Safeguarding as a foundational concept is introduced as part of assessing mental wellbeing. Concepts of categorising and acting on data that informs a patients state of wellness are taught | N/A | Taught content is contextualised in the sense of the new opportunities and risks that are available to them through autonomous assessment. Career development is supported with access sessions from CareersBU |
| Clinical Reasoning and Decision Making in Enhanced Clinical Practice | An emphasis is placed on concepts of holistic therapeutic response and patient centred care in clinical consultation. Active listening and patient advocacy are central to the clinical reasoning model being taught | As part of accurate history taking, students will explore biases in themselves and their patients, and how to act in the patients' interest and when there is a responsibility to the community | Consideration is paid to the weight of responsibility that comes with becoming an independent diagnostician and director of therapy. Content is explored in how to ensure safety while improving diagnostic and therapeutic ability. Career development is supported with access sessions from CareersBU |
| Leadership and Change in Enhanced Clinical Practice | Content considers subjects such as enfranchisement of patients in service improvement | N/A | Skills in regard to project management and managing change in the clinical environment are central to the unit. The applicability of this knowledge to future careers will be emphasised throughout. Career development is supported with access sessions from CareersBU |
| Guiding Professional Development in Enhanced Clinical Practice | Seminars will debate and explore the Enhanced Practitioners role in delivering and curating an environment of effective safeguarding | N/A | Seminars will align with skills valuable in evaluation and promotion of personal and professional ability. This will include content such as effective interviewing practices and identifying evidence of achievement. |

INDICATIVE TIMELINE FOR DEMONSTRATING KNOWLEDGE, SKILLS AND BEHAVIOURS

This is an indicative timeline of when apprentices might typically be able to demonstrate each element of the Knowledge, Skills and Behaviours described in the apprenticeship standard. This is intended only as a guideline – the actual timeline will vary for each apprentice, based on prior learning and individual rates of progress.

Mapping KSB development in ECP is problematic due to the diverse nature of apprentices expected and their differing clinical environments. This is recognised in the Apprenticeship Standard. The following should only be considered a suggested indicator and not specific milestones.

Year 1

| Month | Week1 | Week 2 | Week 3 | Week 4 |
|-------|------------------------------|--|------------------------|--|
| 1 | | | | |
| 2 | | | | |
| 3 | | K4, K5, K6, S4, S5, S6 | | |
| 4 | | | K1, K2, K3, S1, S2, S3 | |
| 5 | | | | K7, K8, K10, K11, S7, S8, S9, S10, S11 |
| 6 | | | | |
| 7 | K24, K25, K26, S24, S25, S26 | | | |
| 8 | | K17, K18, K19, K27, S17, S18, S19, S27 | | |
| 9 | | | | |
| 10 | | | | K20, K21, K22, S20, S21, S22 |
| 11 | | | | |
| 12 | K14, K15, K16, S14, S15, S16 | | | |

Year 2

| Month | Week1 | Week 2 | Week 3 | Week 4 |
|-------|-------|------------------------------|------------------------|------------|

INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES APPRENTICES TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

INTENDED PROGRAMME OUTCOMES

| | |
|--|--|
| <p>A: Subject knowledge and understanding</p> <p>This programme provides opportunities for students to develop and demonstrate knowledge and understanding of:</p> | <p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:</p> |
| <p>A1. Competence in patient assessment and consultation, within a defined scope of practice</p> <p>A2. Contribution to MDT intervention in urgent or emergency situations within the clinical space</p> <p>A3. Demonstrate an enhanced knowledge of anatomy and physiology within a defined scope of practice</p> <p>A4. The role of the enhanced clinician in forming and delivering meaningful holistic plans of care and patient centred care</p> <p>A5. Formation of ongoing treatment goals and alignment to evidence-based practice in the clinical space</p> <p>A6. Empathy and the representation of patient choice within the diagnostic process</p> <p>A7. Understanding of leadership and change management theory</p> <p>A8. Understanding of service improvement within a defined scope of healthcare, and their role in its success</p> | <p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> lectures (A1 to A8); seminars (A1, A4, A5, A6); directed reading (A1, A2, A3, A7, A8); use of the VLE (A1, A2, A3); placement (A1 to A8); workshops (A1, A3, A4, A5, A6); asynchronous preparatory exercises (A1 to A8); self-directed inquiry (A7, A8). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> OSCE (A1, A2, A3); coursework essay (A1, A2, A3, A7, A8); case study (A4, A5, A6); pitch-and-sell (A7, A8); portfolio of work based learning (A1 to A8). |
| <p>B: Intellectual skills</p> <p>This programme provides opportunities for students to:</p> | <p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme outcomes:</p> |
| <p>B1. Employ data in the diagnostic process</p> <p>B2. Understand how to form a meaningful clinical management plan</p> <p>B3. Understand and employ patient-centered care in condition management and intervention</p> <p>B4. Understand the role of ECP as a role-model to the clinical team</p> | <p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> lectures (B1 to B6); seminars (B2, B3); directed reading (B1 to B6); use of the VLE (B5, B6); workshops (B1, B2, B3, B4); asynchronous preparatory exercises (B1 to B6); placement (B1 to B6). |

| | |
|---|--|
| <p>B5. Engage in improvement initiatives in the clinical environment and contribute to developing a culture of excellence</p> <p>B6. Contribute to the wider healthcare team in unpredictable and unplanned events, caring for the wellbeing of patients and participants</p> | <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • OSCE (B1); • coursework essay (B1, B2, B5, B6); • case study (B2, B3, B4, B6); • pitch-and-sell (B4, B5); • portfolio of work-based learning (B1 to B6). |
| <p>C: Practical skills</p> <p>This programme provides opportunities for students to:</p> | <p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:</p> |
| <p>C1. Understand the role of different assessment methods in diagnostic reasoning</p> <p>C2. Understand the role of clinical and management reasoning in building patient-centered relationships</p> <p>C3. Contribute to the Multi-disciplinary team as part of coordinated clinical intervention.</p> <p>C4. Discern and employ different interventions dependent on clinical and situational need</p> | <p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • lectures (C1 to C7); • seminars (C2, C3); • asynchronous preparatory exercises (C1 to C7); • workshops (C1, C2, C3, C4); • use of the VLE (C1, C3, C4); • group exercises (C5, C6, C7). |
| <p>C5. Contribute to an environment of expertise and evidence-based practice in the clinical space.</p> <p>C6. Demonstrate understanding of change management within a defined area of practice.</p> <p>C7. Understanding the role of culture and organizational structure in managing change within the clinical space.</p> | <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • OSCE (C1, C3, C4); • coursework essay (C1, C2, C4, C6); • case study (C2, C4, C5); • pitch-and-sell (C6, C7); • portfolio of work-based learning (C1 to C7). |
| <p>D: Transferable skills</p> <p>This programme provides opportunities for students to:</p> | <p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:</p> |
| <p>D1. Understand the role of assessment in diagnostic reasoning</p> <p>D2. Demonstrate patient advocacy in the role of Enhanced Clinical Practice</p> <p>D3. Understand the role of continued professional development in Enhanced Clinical Practice</p> | <p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • lectures (D1 to D7); • seminars (D2, D4, D6); • workshops (D1, D2, D3, D4, D6); • asynchronous preparatory exercises (D1 to D7); |

| | |
|---|---|
| <p>D4. Contribute to the planning, delivery, monitoring and evaluation of intervention care within a wider episode of care</p> | <ul style="list-style-type: none"> • use of the VLE (D1, D3, D6); • directed reading (D1 to D7); • group work (D3, D4, D5, D7). |
| <p>D5. Contribute to and encourage a culture of improvement and education</p> <p>D6. Engage in effective self-reflection in the evaluation and improvement of ability and impact within healthcare</p> <p>D7. Define, implement, and complete successful management of change, with regard to employment and leadership of personnel.</p> | <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • OSCE (D1, D3, D4, D5); • coursework essay (D1, D3, D4, D7); • case study (D2 TO D6); • pitch-and-sell (D6, D7); • portfolio of work-based learning (D1 to D7). |

Programme Skills Matrix

| Units | | Programme Intended Learning Outcomes | | | | | | | | | | | | | |
|---------|--|--------------------------------------|----|----|----|----|----|----|----|----|----|----|----|----|----|
| | | A1 | A2 | A3 | A4 | A5 | A6 | A7 | A8 | B1 | B2 | B3 | B4 | B5 | B6 |
| Level 6 | Enhanced Assessment Skills for Clinical Practice | | | | | | | | | | | | | | |
| | Clinical Reasoning and Decision Making in Enhanced Clinical Practice | | | | | | | | | | | | | | |
| | Leadership and Change in Enhanced Clinical Practice | | | | | | | | | | | | | | |
| | Guiding Professional Development in Enhanced Clinical Practice | | | | | | | | | | | | | | |

ADMISSION REGULATIONS

The regulations for this programme are the University's Standard Undergraduate/Postgraduate/Graduate Diploma/Graduate Certificate Admission Regulations.

Bournemouth University Apprenticeship Board and Admissions Group are currently exploring a institutional approach to admission requirements for apprenticeships, so please be aware that the following is a proposal based on current understanding and may alter to align with future unified application criteria.

In order to commence on the programme, in line with modern Apprenticeship requirements, students place of work must be in a stable clinical environment suitable to the requirements of the role and conducive to acting in the capacity of Enhanced Clinical Practice. They must also have a nominated mentor experienced in clinical assessment, diagnostics, and management. They must be willing to commit to the facilitation of work-based learning. Examples of appropriate mentor include, but are not limited to, Advanced Clinical Practitioner, Enhanced Clinical Practitioner or Specialist nurse/practitioner, though note this is not an exhaustive list. The mentor must be experienced and currently practicing within the same specialty that the student intends to practice. If the mentor is changed during the course of the programme students are required to consult programme lead to review proposed replacement mentor. The student must also have agreement from their employer that they are willing to support their study throughout the length of the programme and any related End Point Assessment process. In addition to above apprenticeship requirements, students must hold a professional registration with a recognised healthcare regulatory body.

Students must also provide evidence of qualification at Level 2 in English and Maths to commence the programme. This is a requirement of commencement of End Point Assessment for the IATE apprenticeship

When linked to an apprenticeship, students must engage in an assessment of existing ability in relation to learning objectives identified by that related apprenticeship, referred to as KSBs (Knowledge, Skills and Behaviours). The student must produce this as part of the application process and before admission to the programme. The University's standard RPL credit allowances apply to students with relevant prior learning

PROGRESSION ROUTES

In the associated Apprenticeship Standard, IATE make a clear statement that Enhanced Clinical Practice and Advanced Clinical Practice are linked in a natural route of progression. To reflect this, achievement of qualification in Enhanced Clinical Practice at level 6 or level 7 will satisfy the academic component of application for MSc Advanced Clinical Practice.

In order to take advantage of exciting new approaches to learning and teaching, as well as developments in industry, the current, approved Articulation/Recognition/Progression route(s) for this programme may be subject to change. Where this happens students will be informed and supported by the faculty as early as possible.

Recognition arrangements provide formally approved entry or progression routes through which apprentices are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply. Please see the [recognition register](#) for a full list of approved Recognition arrangements and agreed entry criteria.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Undergraduate / Postgraduate / Foundation degree / Higher National / Graduate Diploma / Graduate Certificate Assessment Regulations.

OFF-THE-JOB TRAINING DELIVERY

Off-job training will be delivered by day release. This will be a combination of scheduled taught content via defined units and guidance on application of knowledge in the clinical space. The programme will be 68 weeks in length, students working 30 hours per week or more who have no RPL of KSB will be expected to complete 483 hours of off-job training. Direct delivery of learning equates to 125 hours, with 358 hours attributed to self-directed study. This will include preparatory study for taught session and linked assessments. Additionally, it will be employed in learning towards application of KSBs in the clinical space, and curation of a portfolio of evidence required as part of the End Point Assessment process. Students will be guided to satisfying this requirement through a multifocal approach. It is the student's responsibility to record and maintain evidence of off-job training hours completed. Apprentices will be supported in this through apprenticeship compliance software named BUD. At defined milestones each students logged hours will be compared to the expected amount by that point of the programme. Those students not achieving this expected amount will be contacted and supported. A portfolio of exercises linked to preparation or follow-on from taught content will be curated, each with an expected amount of hours to complete. Templates for documenting and exploring experiential learning opportunities will be available to each student Off-job training will be scrutinised by Tripartite at regular intervals.

CAREERS SUPPORT

Application of practical knowledge is a cornerstone principle in programme design in the Enhanced Clinical Practice programme. Apprentices will be encouraged at all times to implement skills learnt into their clinical practice and reflect on their effect. The concept of service development and career development are embedded principals in the third unit of study, where students will be encouraged to consider their development after conclusion of the programme. In addition to these processes, CareersBU have committed to hosting workshops supporting career progression, which will be available to apprentices on the programme.

APPROVED SUB-CONTRACTORS
